

## Cookies policy

Cookies are small text files placed on the disk drive of a terminal device while you use websites. Thanks to those files, the website administered by ATM S.A. (hereinafter: the Website) identifies your computer and verifies if you have visited the Website before, which allows, among others, displaying the Website according to your individual preferences, and helps to optimize it. At the same time, cookies do not contain any personal data that could allow us to identify a particular computer user.

The Website also applies cookies necessary for using Google Analytics, a tool for creating aggregated statistics. Thanks to this tool, we can learn, among others, how the Internet users use the Website (without identifying them in person), what they look for on it and how much time they spend on individual subpages, as well as the languages they speak, the area in the world they come from and the web browsers they use. This knowledge helps us in further enhancement of the Website's structure and its content, so that they all meet your expectations: to be as functional as possible, and contain the information that interests you the most.

You can impact the way Google Analytics collects your data thanks to a web browser add-on that blocks Google Analytics. The add-on instructs the Google Analytics JavaScript not to send any information about the website visit to Google Analytics. If you wish to disable the sending of such information, download and install the add-on for your particular web browser. It is available for: Microsoft Internet Explorer, Google Chrome, Mozilla Firefox, Apple Safari and Opera at: <https://tools.google.com/dlpage/gaoptout?hl=en>.

By default the browsers allow placing cookies on your terminal device, but every user can opt out. To do so, you may change the settings of your web browser so it blocks cookies or informs you every time the file is sent to your device. It should be noted, however, that not accepting cookies may limit the functionality of the Website.

The above information constitutes an implementation of the provisions of Article 173 of the Act of 16 July 2004 – Telecommunications Law (Journal of Laws No 171, item 1800, as amended).
