

## Professional VoIP services

**Cheap calls, group calls, virtual faxes, call forwarding, short codes and much more from VoIP services**

Efficient and effective communication between employees is a key to a company's success. It is therefore well worth looking at services which might have a positive impact on this area of business. Use Atman services to make your business more efficient through easier communication for staff and customers.

### Atman SIP Trunk

Make business phone calls via an IP network

Using the Atman SIP Trunk service, you can enhance traditional telephone connections with the advantages of Internet telephony. Without the need to replace any equipment, you can save on the cost of calls and maintaining numbers, and increase the number of calls that can take place at one time.

#### Advantages

- Reduced costs
- Ability to assign numbers from the Atman pool or transferred from another operator
- Ability to use numbers from multiple numbering zones in one place
- No charges for internal calls
- Low technical requirements
- Handling of multiple numbers on a single SIP account

### Atman Virtual Switchboard

Ensure professional telephone communication in your company using a virtual switchboard

The Atman Virtual Switchboard is an enhanced form of the traditional telephone switchboard which enables the effective management of voice communication.

The service offers a wide range of functions, including:

- Call groups – combine several numbers into a group offering a single common main number
- Answering groups – interception of calls made to other group members
- Centrex – activation of a simple voice message, use of short codes
- Provisioning – configuration of telephone device parameters
- Voice mail – upload a file with a welcome message
- Call forwarding – forwarding of calls to a specified telephone number

#### Advantages

- Money savings – no need to invest in a physical switchboard
- Time savings
- Convenience – a range of functions to make work more efficient
- A simple and intuitive panel for managing the service

### Atman eFax

Instead of buying an expensive machine, send and receive faxes over the Internet – conveniently, cheaply and ecologically

The Atman eFax service (fax2web and web2fax) **fully replaces a traditional fax machine.** Internet faxing can be used both to send and receive documents in PDF format.

#### Advantages

- A simple and intuitive panel for managing the service
- Money savings – no need to buy physical devices or pay for their maintenance, servicing, modernization, materials or power
- Faxes can be sent and received anywhere where there is Internet access
- Full archiving of sent and received faxes, available from the panel
- Print out only the documents you need

### Atman Teleconferences

Arrange business conferences or group work so that not everyone needs to be in the same office

Atman Teleconferences enable many people to communicate at one time – rooms can be set up for group telephone calls, regardless of where people are at a given moment.

All that is required is for all those who wish to take part in the discussion to call the number assigned to the virtual conference room and enter the PIN for the conference they wish to join.

#### Advantages

- A simple and intuitive panel for managing the service
- The number of people taking part in a teleconference is unlimited
- Savings on costs of travel, accommodation, hiring of conference rooms, etc.
- Fast and effective communication with many persons at the same time
